## LASER & SHORING

SALES | RENTAL | SERVICE

At Ozark Laser we are more than a supply company, we are your business partner for positioning solutions. We represent the number one positioning product in the world and with five locations to serve you, we're never out of reach. Ozark Laser's goal is to help your crews work more efficiently, and that is the bottom-line.

# SERVICE CENTER

We have state-of-the-art service centers with the capability to fix almost anything! Whether you have a prototype you want designed, or that favorite laser you want to keep in service, call and talk to our technicians today!

We have the most advanced precision tooling available for electronics, electromechanical, and optical instrumentation.

Ozark Laser's service centers also offer complete machine shops so we can fabricate tooling in-house for special applications.

Our labs have advanced calibration ranges and physical targets to calibrate everything from total stations to pipe lasers and everything in between! We can even restring crosshairs and wire hung compensators!

## ALL TYPES

- General Construction Lasers
